

## BurnDown chart

Date - June 21st, 2024 - July 5th, 2024

The burndown chart for Sprint 2 shows an initial steady count of 5 issues, with significant drops on June 25 and July 1. Most issues were resolved towards the end, with all issues completed by July 5. Despite midterms we effectively managed and resolved all tasks, demonstrating strong collaboration and workload management.

The planned velocity for Sprint 2 remained consistent with Sprint 1 at approximately 36-37 story points. We managed to complete all planned story points in both sprints, indicating stable performance and effective workload management. The consistency in our planned and completed velocities suggests that we have a good understanding of our capacity and can maintain a steady work pace.
